PL14 6RL	PL32 9UB	TR12 6HU	TR19 6QT	

Please note:

- Postcodes listed are those where there are at least two premises to be upgraded, most work will be completed by end 2020.
- Unforeseen circumstances can mean that upgrade plans for a given area may change. In some cases this can mean that unfortunately an area becomes economically unviable to complete.
- The map showing planned upgraded areas has been discontinued. You can see a broadband coverage maps at <https://labs.thinkbroadband.com/local/browse> (click on UK Broadband Map) and <https://checker.ofcom.org.uk/broadband-coverage> (enter postcode then click on View Map).
- Although we are using postcodes for this analysis, it is worth bearing in mind that this is an imprecise science! Unfortunately, the boundaries of postcode areas do not neatly align with the way the network deployment needs to happen. So once an area has been enabled, it is not necessarily true that all the premises in the postcode will experience an improvement in broadband speeds. Equally, speed improvements may also be seen outside the postcode areas specified.
